Re: Deadline extension, Underground Storage Tank release report for:
Fort Story site #6, LARC Maintenance Area
Fort Story site #7, Auto Craft Building

Dear Sir:

This is in response to your January 7, 1992, requests for extensions of the deadlines for your reports of subsurface petroleum contamination at these sites. A 60 day extension is granted for each report. Please submit the Initial Abatement Measures Report to this office by March 13, 1992, and the Site Characterization Report by April 6, 1992.

If an additional deadline extension becomes necessary, it must be approved by this Agency prior to expiration of the extended deadline. A request for any additional extension must be fully justified and completely substantiated with supporting documentation of actual delays, as opposed to potential delays. A new schedule for completion of work and submittal of reports must be provided.

Please note that requests for extension of more than 60 days cannot be granted by this regional office. We will review such requests, however, and if warranted, will forward them to Virginia Water Control Board headquarters for consideration.

If you have questions, please call Tom Madigan of my staff at (804) 552-1840.

Sincerely,

A handwritten signature in cursive script that reads "Donald G. Kain".

Donald G. Kain
